

ABSTRACT OF THE DISCLOSURE

In an electrophotographic photosensitive member having a support, and provided thereon a photosensitive layer, a surface layer of the

5 electrophotographic photosensitive member contains a high-molecular-weight charge-transporting material having a weight-average molecular weight M_w of from 1,000 or more to 9,000 or less, and the ratio of the weight-average molecular weight M_w of the

10 high-molecular-weight charge-transporting material to a number-average molecular weight M_n of the high-molecular-weight charge-transporting material, M_w/M_n , is from more than 1.00 to 1.10 or less. Also disclosed are a process cartridge and an

15 electrophotographic apparatus which have such an electrophotographic photosensitive member.
